vandermoon.com

Since 1993, Vitberg has been producing medical devices for rehabilitation, treatment, cosmetology and sports.

Its products are known and appreciated. Medicine and technology are not our only passion, we also love exploring the world.

We have translated the experience gained over the years into the production of accessories for people like us. This is how the Van Der Moon brand was born.

Made in Poland, EU.

General information

The construction of the MoonBox is made of high-quality aluminum and special, super-strong and ultra-light polypropylene chamber plates. The boards are resistant to temperatures, water, oils and chemicals. The connections are riveted and screwed and additionally reinforced with a layer of glue, thanks to which the structure becomes even more durable and resistant to any vibrations. The MoonBox construction is covered with an additional 0.5 cm foam coating, and the corners of the structure are reinforced to avoid any damage during possible mechanical operation. Depending on the size, the MoonBox has 2 shelves (MoonBox 50 and 70 cm) or 4 shelves (MoonBox 95 and 115 cm). The size of the shelves allows for easy storage of assortment of various sizes. In sizes 95 and 115, the space of the shelves is divided in half to strengthen the load capacity of the shelf and to divide the storage space. In the inner part of the MoonBox there are holders for mounting protective nets (Moon Safety) - these catches are made of aluminum sheet and painted with powder varnish. The MoonBox is trimmed with a durable technical fabric. The material is characterized by durability and high resistance to abrasion, tearing and mechanical actions, it is light and relatively stiff. It is made of polyester fibers that slightly absorb water, but thanks to the PVC-coated bottom layer, the fabric is waterproof. There are mounting holes on the structure, finished with plates specially designed for this purpose. The upper part of the cover is equipped with a handle for convenient carrying of the MoonBox.

Compatible car models:

Car brand	Model	Version	MOONBOX	ANGLE
Mercedes	Sprinter 901		●	110°

MoonBox will **not get wet** and you can **clean** it easily.

MoonBox is upholstered with durable fabric that stands up very well to various weather conditions. The inner side of the fabric is Laminated with a special coating, which makes the MoonBox waterproof and vapor proof. Thanks to these features, it is easy to clean: all you need is a vacuum

Top quality.

One MoonBox is 417 pieces fitted together. To make it, we need 3 workers and 16h of labor. The components come from EU suppliers and manufacturers.

MOONBOX

Super durable. Ultra lightweight.

Soft and **myopic**.

Meet the softest of „hard“ furniture for your Van. We covered 98% of MoonBox’s surface with a special cushioning sponge. Now MoonBox is soft, safe for your head and very elegant.

Armored? Almost!

MoonBox is built from high-quality aluminum and special chamber plates. We cut, bend and crease the structural elements with an accuracy of 0.1 mm. It is much more than enough. But that’s why the MoonBoxes are so solid.

Information **regarding use**

Cleaning

Handwash. Rinse the soiled area thoroughly with clean water and wipe it with a sponge gently using a mild detergent. Do not use bleach, iron or heat drying. The product is not machine washable. Before cleaning, remove all elements from the inside of the MoonBox along with the shelf. Metal parts should be dry cleaned.

Composition

poliester 100%, coating PVC-FLAT, aluminium, polypropylene plate

Transport and storage

The products are packed in cardboard outer packaging. During transport, they should be placed horizontally or vertically. Must be transported in the original packaging.

Disposal of the packaging

The packaging is made of recyclable cardboard, so it should not be thrown away, but stored in a landfill in waste paper bins or special containers for cardboard packaging.

Precautions

Please make sure you have read and understood the instructions before using the MoonBox.

After installation, it is recommended to check the mounting of the MoonBox by pulling the entire structure firmly.

Do not leave the MoonBox in direct sunlight - it may cause fading of the material. This does not change the mechanical properties of the material.

Do not use open fire near the MoonBox.

Protect against moisture.

Do not load the MoonBox beyond the recommended maximum weight.

Do not use any sharp objects such as knives, screwdrivers, etc. to remove the outer packaging.
